101ENGLISH
AI-Powered EPIC Learning Platform

Every app is built from scratch for YOUR institution. Every change imaginable, delivered.

AI-Native Architecture

Because each app is built from scratch, every exercise is generated by AI in real-time and personalized to YOUR institution's needs:

CEFR Level: Pre-A1 through C2 - you choose the range
Topics: Your syllabus, your themes, your scenarios
Native Language: Hebrew, Arabic, Russian, or any L1
Cognitive Levels: Foundation > Connection > Application > Analysis

No static databases. No generic content. Every interaction is unique and tailored to your students.

Native Tongue Adaptability

Each app is built around the student's native language - not as an afterthought, but as a core design principle:

Full L1 Interface: Instructions, navigation, and rubrics in the student's language
Bilingual Feedback: Explanations in native language with English translation toggle
Bilingual Rubrics: Content / Structure / Vocabulary / Grammar / Mechanics
Vocabulary Cards: English word + L1 translation + phonetics + audio

Currently supporting Hebrew, Arabic, Russian, Amharic - scalable to any L1 your institution needs.

Human-Like Feedback System

AI-generated feedback that feels like a real teacher, tailored to each student:

Writing: Bilingual rubric grading + detailed corrections in student's L1
Speaking: Real-time AI conversation with pronunciation & fluency scoring
Reading & Listening: Cognitive-level tagging + immediate targeted feedback

Every rubric, every correction, every suggestion - customized to your institution's standards.

Full EPIC Skill Coverage

One tailor-made app covers all 7 EPIC skills:

Reading: AI-generated passages + cognitive-level questions
Listening: Audio tasks + comprehension checks
Grammar: Contextual exercises, not isolated drills
Writing: Open prompts + rubric-based AI grading
Speaking: Voice conversations with AI teacher
Vocabulary: Flashcards, games, Word of the Day (Pre-A1 to C2)
Words in Context: Vocabulary in authentic scenarios

All generated in real-time. Nothing pre-made. Everything adapts.

A Complete Stand-Alone Learning Platform

Not just a tool - a fully independent learning environment for students and teachers:

For Students: Self-paced practice, AI-guided feedback, and progress tracking - all in one place
For Teachers: Assignment management, real-time analytics, and full class visibility

CEFR-Aligned & Adaptive: Every exercise and assessment mapped to the full CEFR spectrum (Pre-A1 to C2).
Content and difficulty adapt to each student's level - automatically.

Methodology-Flexible: Scenario-based learning, task-based instruction, or any pedagogical approach. The AI
generates content aligned with YOUR methodology.

Every institution gets a platform tailored to its curriculum, language, levels, and teaching philosophy.

Teacher Dashboard & Analytics

The app works alongside teachers, giving them real-time visibility:

Class-level view: Performance across all 7 EPIC skills at a glance
Student-level drill-down: Individual progress, strengths, and gaps
CEFR tracking: Filter by level to see who's advancing
Color-coded performance: Instant visual identification of at-risk students
Assignment management: Assign tasks, track deadlines, monitor progress

Teachers spend less time on logistics and more on pedagogy and personalized attention.

Proven Impact

Currently live in multiple academic institutions:

Thousands of active student accounts across EPIC skills
4 institutions including colleges, universities and pre-academic programs
All apps built on the same platform, each uniquely tailored

Institutions can request changes to any aspect of the app - from rubric criteria to UI language to content topics.

The platform also supports formal assessment and placement testing.

Let's Talk

We build tailor-made AI-powered EPIC apps for academic institutions.

What we offer:
1. A pilot for your institution
2. Full customization to your syllabus, themes, and scenarios
3. A dedicated partnership to evolve the app with your needs
4. Formal assessment and placement testing capabilities

Let's explore how we can build YOUR app.
